### Telephone System Management:

The questions that make a difference to your business:

- How many non-business related calls are being made from your company every day?
- Is your PABX fed with the optimum number of lines?
- Are these lines linked to the most efficient network carrier for your needs?
- How many customers does your company aggravate, or worse lose, through abandoned calls and unacceptable ring times?
- Do your staff use premium services more than necessary?
- Which department or individual incurs the majority of these costs?
